STATISTICS OF LEATHER

WASHINGTON, D. C., *September 25, 1918.*—The results of the census of leather stocks on hand and in transit in the United States, May 31, 1918, obtained by the Bureau of the Census at the request of the War Industries Board, have been issued by Director Sam. L. Rogers of the Bureau of the Census, Department of Commerce. The work was done under the supervision of Eugene F. Hartley, Chief Statistician for Manufactures. A thorough canvass of the United States was made for leather stocks on hand May 31, 1918. Schedules were sent to manufacturers of boots and shoes, gloves, and harness and saddlery, and to dealers in leather and to tanners who do not report to the Tanners' Council. In order to include all establishments where there was likelihood of a leather supply, schedules were also sent to manufacturers of automobiles, carriages and wagons, and to repair shops, etc. Of the 26,200 schedules mailed, 3,266 reported stocks of leather or findings on hand.

Leather stocks were reported to the Census Bureau by manufacturers of boots and shoes, gloves, harness and saddlery, and other leather goods, and by dealers, importers, and tanners not reporting to the Tanners' Council.

The census schedule requested that stock reported to the Tanners' Council should not be included in the census returns. There is presented, however, at the end of the report, a statement showing the total finished leather on hand and in transit, May 31, 1918, as reported to the Tanners' Council and to the Bureau of the Census.

A summary following shows total leather stocks owned in the United States, May 31, 1918, giving the number of sides, skins, etc., with equivalent in pounds or square feet.

Table I gives the leather stocks on hand, showing separately the stocks reported by the several classes of manufacturers and by dealers and tanners.

Table II shows a distribution by states of the quantities of the various kinds of leather reported by the different groups of manufacturers and by leather dealers and tanners.

Table III shows the total quantities of the various kinds of cut stock and findings, the quantities reported by the manufacturers of boots and shoes, of cut stock, of other leather goods (including gloves and harness and saddlery), and by dealers and tanners being shown separately.
